

Algeria DAC High-Speed Cable QSFP

Overview

56G QSFP+ Active cable is a high performance, low power, long distance interconnect solution that supports 16G / 10G / 8G /4G /2G Fibre Channel of InfiniBand FDR /QDR /DDR /SDR, each capable of transferring data at rates up to 14Gb/s. Leading the Digital Transformation of North African Data Centers with High-Performance Active Optical Cables and Direct Attach Copper Solutions. Algeria is currently undergoing a massive digital transformation under its "Digital Algeria 2030" strategy. It integrates eight data channels, each capable of running at 53. 125Gbps using OM3 fiber and up to 70m. Thanks to their four-lane parallel architecture, QSFP cables combine high bandwidth with compact design. 10Gtek has developed a "matrix cable" to realize coordinated calculation of multiple groups of computing units and to distribute computing power faster in supercomputing. The 100G AOC active optical cable refers to the optical. FS 40G DAC/AOC cables are compliant with MSA and IEEE standards for guaranteed compatibility and optimal performance and suitable for servers, switches, storage, etc. Purchase from nearby warehouses.
