

Are network server racks in high demand

AI Overview

Yes, network server racks are in high demand, driven by cloud computing, AI workloads, edge computing, and the expansion of data centers worldwide.

Market Growth and ProjectionsThe global server rack market is experiencing significant growth. In 2026, the market is valued at approximately USD 3.67 billion and is projected to reach USD 7.21 billion by 2035, growing at a CAGR of 7.7% . Similarly, the data center server rack market is expected to expand from USD 126.55 billion in 2026 to around USD 535 billion by 2035, with a CAGR of 17.42% . This growth reflects the increasing reliance on digital infrastructure, cloud services, and high-density computing environments.

Key Drivers of Demand

- Cloud and AI Workloads:** The rise of hyperscale and cloud-native data centers has increased the need for modular, high-density racks capable of supporting GPU-intensive workloads and AI applications .
- Edge Computing:** Decentralized networks and edge data centers require smaller, secure rack systems to host mission-critical workloads closer to end users .
- 5G and Data Traffic Growth:** The rollout of 5G and the proliferation of IoT, AR/VR, and high-definition streaming are driving data center expansion, which in turn increases server rack demand .
- Infrastructure Modernization:** Enterprises and service providers are upgrading to energy-efficient, modular racks with advanced cooling and power management to optimize performance and reduce downtime .

Regional Insights

- North America** leads the global market, accounting for roughly 35–38% of demand, largely due to a high concentration of cloud service providers and hyperscale data centers .
- Asia-Pacific** is expected to grow at the fastest rate, driven by rapid digital transformation and data center construction in countries like China, Japan, and India .

Market Segmentation

- Rack Types:** Standard 42U racks dominate the market, while open-frame and modular racks are growing rapidly due to flexibility and high-density support .
- End Users:** Key sectors include IT & telecom, BFSI, healthcare, and govern...
