

Australian Lighting Distribution Box Manufacturer Quote

AI Overview

E-abel and Schneider Electric are leading Australian manufacturers of distribution boxes, offering compliance with local standards and online quotation options. Key Manufacturers E-abel specializes in high-quality distribution boxes designed for industrial control and power distribution. Their products comply with Australian Standards AS/NZS 61439, ensuring electrical safety, thermal performance, and durability in harsh environments. E-abel uses advanced manufacturing techniques such as nitrogen cutting and full welding, and their boxes feature X15 orange powder coating for UV and corrosion resistance. They also implement rigorous quality control and testing for both structural and electrical components, making them suitable for mining, construction, and other demanding sectors (E-abel). Schneider Electric Australia provides a wide range of distribution boards, including EV distribution boards for electric vehicle infrastructure. They offer an online switchboard configuration tool (Flex Select) that allows users to generate instant quotations and technical drawings. Orders are typically shipped within 48 hours, making it a fast and efficient option for obtaining quotes and placing orders (Schneider Electric).

Obtaining a Quote

E-abel: Contact their sales team via their website to discuss your project requirements, including size, customization, and environmental considerations. They can provide detailed quotations based on your specifications and compliance needs.

Schneider Electric: Use the Flex Select online tool to configure your distribution board, receive an instant quote, and access technical drawings. This tool is particularly useful for standard and EV-specific distribution boards.

Considerations Ensure the distribution boxes meet Australian electrical safety standards (AS/NZS 61439) and any relevant SAA certifications. Specify environment...
