

Cable tray bends and their prices

AI Overview

Cable tray bends are available in various angles, materials, and duty ratings, with prices starting from around \$0.80 per unit for bulk orders.

Types and Configurations

Cable tray bends are designed to change the direction of cable runs smoothly and are available in multiple configurations:

- Angles:** Common bends include 45° and 90°, with some adjustable bends offering 30°, 60°, and 75° options for medium and heavy-duty trays.
- Orientation:** Bends can be horizontal (inside or outside) or vertical (inside or outside) to accommodate different routing needs.
- Flat vs Ladder:** Flat bends are used for tray systems with a solid base, while ladder-type bends are ventilated and suitable for heavier cable loads.
- Materials**

Cable tray bends are manufactured from durable materials to suit different environments:

- Galvanized Steel:** Pre-galvanized (PG) or hot-dip galvanized (HDG) for corrosion resistance.
- Aluminum:** Lightweight and corrosion-resistant, suitable for indoor and outdoor use.
- Stainless Steel (Grade 316L):** Ideal for harsh or chemical environments, offering long-term durability.
- PVC:** Non-metallic options for light-duty applications, often used in office or low-voltage installations.

Duty Ratings

- Light Duty:** Suitable for small cable loads and indoor applications.
- Medium Duty:** Supports moderate cable loads, often used in commercial or industrial settings.
- Heavy Duty:** Designed for large cable bundles and industrial environments, providing maximum structural support.

Pricing

- Bulk Orders:** Prices for bend cable trays start at approximately \$0.80 per unit for stainless steel or wire mesh types when purchased in bulk (minimum 10 units) on platforms like Alibaba.
- Retail/Standard Units:** Prices vary depending on material, size, and angle. For example, pre-galvanized 90° medium-duty bends are available from suppliers like Shop4 Electrical, with pricing dependent on width and height.
- Custom or High-Grade Materials:** Stainless steel or aluminum bends, especially for heavy-duty or large-width trays, are typically higher in cost due to material and manufacturing...
