

Canada Maintenance Transparent Optical Cable G 652D

Overview

This single-mode optical fiber is compliant with ITU-T G. Quality and proven performance. SMF-28e+ ® fiber can be purchased natural or colored. “Leviton is dedicated to designing, developing and manufacturing sustainable high performance structured cabling and specialty cabling solutions. 1dBNote: Due to OTDR measurement uncertainty B3 International cannot guarantee attenuation values at fibres shorter than 1000m. Parameters are subject to change without notice. Specifications are for product as supplied by Prysmian: any modification or alteration afterward of product may give different result. The information contained within this document must not be copied, reprinted or reproduced. This document outlines the specifications for a single-mode optical fiber and cable designed for use around the 1310 nm zero-dispersion wavelength, suitable for both the 1310 nm and 1550 nm regions, and compatible with analogue and digital transmission.
