

Detailed Explanation of Singapore Electrical Distribution Boxes

Overview

DB box guide for Singapore homes: what the distribution board does, MCB vs RCCB explained, signs you need an upgrade, 6-way from \$380, EMA licensing rules. Every Singapore home has one supply cable coming in from the grid. The DB box divides that single feed into separate circuits — lighting, 13A power sockets, aircon, water heater, cooker — so a fault on one circuit does not take down the whole house, and each circuit's wiring is protected by a. Functional layout of a residential DB — supply in, protection in the middle, circuits out. When an appliance shorts, current spikes. The sub-circuit MCB on the affected circuit sees the surge and trips first. If the fault is earth leakage rather than a hard short, the. Ever opened your electrical DB box and felt lost looking at all the switches?

The Distribution Board (DB box) is the control center for your home's power. Knowing what's inside helps you understand how electricity is distributed — and how to stay safe. Busbars distribute electricity evenly across circuits. Explain the rationale for some key design features for.
