

Detailed Price List for Fireproof Cable Trays in Spain

AI Overview

Ordinary fireproof cable trays in Spain typically range from €20 to €60 per meter, depending on material, type, and manufacturer. Overview Fireproof cable trays are essential for safely routing electrical cables while providing protection against fire hazards. In Spain, these trays are commonly made from galvanized steel, stainless steel, or FRP (fiber-reinforced plastic) and come in types such as ladder, perforated, or solid bottom trays. The choice of material and design affects both durability and price. Typical Price Range Galvanized steel ladder trays: €20–€35 per meter Perforated or solid bottom galvanized steel trays: €25–€45 per meter Stainless steel trays: €40–€60 per meter FRP or specialized fire-resistant trays: €50–€70 per meter Prices vary based on tray width, load capacity, and fire-resistance certification. Custom sizes or additional coatings for corrosion resistance may increase costs. Suppliers and Manufacturers Spain has several reputable cable tray manufacturers and suppliers, including Valdinox, Dimeco, Quickfence, Basor Electric, and Pemsa, offering high-quality fireproof trays suitable for industrial, commercial, and residential projects. Many suppliers provide customizable options and can advise on the best tray type for specific fire safety requirements. Recommendations Request quotes directly from multiple suppliers to get accurate pricing for your project. Check compliance with Spanish and international fire safety standards. Consider installation costs, as some tray types (e.g., ladder trays) are easier and faster to install, potentially reducing overall project expenses. By comparing suppliers and specifications, you can select a fireproof cable tray that balances cost, durability, and safety for your project in Spain.
