

Distribution Box Data Acquisition Gateway

Overview

Central to data collection, storage, and distribution, data acquisition (DAQ) server and gateway provides remote access to real-time system performance and metered energy data. This article provides you an overview of the Azure Data Box Gateway solution, benefits, key capabilities, and the scenarios where you can deploy this device. Compatible with all Accuenergy meters and third-party devices, it stores data locally until it is ready to. HMS gateways and protocol converters simplify industrial connectivity by making it easy to connect devices, machines, controllers, and systems quickly and reliably. With over 250 models, we can solve almost any connectivity challenge.
