

Distribution Box Level 3 Box Label Model and Specifications

Overview

Brand : EPS Model : EM-3 45 ways Size : 400*610*120mm DB Series : Suitable to fit RCD, Isolator, Switch fuse or MCB as main switch DBM Series : Suitable to fit MCCB as main switch. Fitted with one set neutral and earth link. Without any wiring and busbar Provide sticker to mark it Redesigned to improve safety, product longevity and appearance over time. Note: Eaton recommends mounting redesigned enclosures with at least six inches of clearance between adjacent structures to provide adequate access to side bolts. a Applicable for type LWPQ only. Note: Only panelboards. This document provides specifications for various distribution boxes including dimensions, mounting sizes, and number of ways. The wide range of distribution boards enables each customer to select an individual and economical. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices. To meet all specifications (practices, speed of implementation, ease of maintenance, continuity of service, etc.
