

Distribution Box Module 1

Overview

Space-saving design: surface-mounted distribution box, 1 row for 1 module (circuit breaker/circuit breaker) - ideal for a fuse in small installations or retrofits. Length: 135 mm, width: 53 mm, depth (including lid): 82 mm with pre-punched cable entries. Its purpose is to connect several wires without having to solder them or use any additional terminal blocks or other connections, which greatly facilitates the. Murrelektronik's passive distribution boxes provide a much more convenient method for connecting sensors and actuators to the control cabinet. Murrelektronik supplies a comprehensive range of distribution boxes: They create optimum installations for any application and are cost-effective, reliable. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices. Each fuse is designed to blow when the current exceeds a certain limit, thereby cutting off the power to prevent damage. Robust and durable: high-quality.
