

Distribution box 380 connected to 220

Overview

A 380 V high-voltage DC PDU supports 240 V/380 V DC and 220V AC power input and provides two output groups A1 and B1. Each group controls four HVDC-3Z-03 sockets. When the groups are connected to a chassis, the total current of all sockets in each group cannot exceed 63 A. In a combination of single phase and three phase distribution board (380V/220V), the single phase, 220V load circuits should be connected via three wires i. Phase (Any hot or line), Neutral and Protective Earth to the Earthing/Grounding. Each outgoing circuit breaker can only produce a 380V voltage between any two phases. For voltage R 10 MCB, voltage S 10 MCB and voltage T 10 MCB. For more information, watch the video. For. Discover 220v 380v industrial socket boxes with IP67 waterproof rating and CE certification.
