

Distribution box placed

Overview

Bottom Line Up Front: Your home's distribution box (electrical panel) is typically located in the basement, garage, utility room, or mounted outside near your electrical meter. It is commonly used in homes, offices, and industrial settings to control and protect electrical circuits. To find it quickly, look for a rectangular gray metal box about the size of a medicine cabinet, often positioned close to. Choose the right box based on environment (indoor/outdoor), load capacity, and durability. Practice good wiring: secure. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices.
