

East Africa Trough Cable Tray Price List

AI Overview

Cable tray installation in East Africa typically ranges from \$5 to \$30 per meter, depending on material, type, and installation complexity.

Material and Tray Type Costs

- Galvanized Steel Trays:** Most common and cost-effective, suitable for general indoor and outdoor use. Prices in East Africa range from \$5 to \$15 per meter depending on thickness and width.
- Aluminum Trays:** Lightweight and corrosion-resistant, ideal for humid or coastal areas. Prices range from \$6 to \$30 per meter.
- Stainless Steel Trays:** Highly durable and corrosion-resistant, used in industrial or chemical environments. These are the most expensive, often exceeding \$25 per meter.
- FRP (Fiberglass) Trays:** Suitable for aggressive environments, with prices from \$10 to \$50 per meter.

Tray types also affect cost: ladder trays are more expensive but support heavier cables, while perforated or mesh trays are cheaper and suitable for lighter loads.

Installation Costs

Installation costs vary based on labor rates, complexity, and accessories such as brackets, supports, and connectors. In East Africa, labor and installation typically add \$2 to \$10 per meter to the material cost. Complex installations, such as raised floors or industrial facilities, may increase costs further.

Regional Considerations

Kenya: Suppliers like TDK Tech Store and Duff Engineering provide standard and custom trays, with delivery across major cities and neighboring countries like Uganda, Tanzania, Rwanda, and South Sudan.

Bulk Orders: Large projects can negotiate discounts of 20%–40%, reducing per-meter costs significantly.

Shipping and Import: Importing trays from China or other regions can reduce costs by 30%–50%, but shipping and customs fees should be considered.
