

Fiber Optic Cable DJ

Overview

AFL's Non-Armored Double Jacket Loose Tube fiber optic cables are designed to provide high fiber counts with the flexibility and versatility required for today's most demanding installations while incorporating a second jacket when extra mechanical protection is desired. Metal free indoor fiber optic cable with 12 Fiber G50/125-OM3 Turquoise Jacket. Strain relief, tight bending radii, and low smoke, halogen free properties. InAir ADSS DJ (All-Dielectric Self-Supporting Double Jacket) is the most reliable among all-dielectric self-supporting double jacketed fiber optic cables. It is the best ADSS aerial solution for long spans as it can be installed in intercity communication lines with distances between towers. Please Use the "ADD TO QUOTE BUTTON" or call us at (866) 650-3282 for more information. Beginning with optical ground wire (OPGW), introduced in 1984 as AFL's flagship product, the line now spans to cabling solutions being used in the. rush and impact resistant fiber cable. The rugged Kevlar reinforced dual jacketing eliminates the need for defined pathway, does not require grounding er diameter of 0. The outer jacket is Black with a stripe to indicate the fiber um application, and UL 1666 compliant.
