

Fiber optic cable pre-reservation or surplus

AI Overview

Fiber optic cables are widely available as surplus stock, offering immediate or near-term delivery, while pre-reservation options are less common and typically handled directly through manufacturers or distributors.

Surplus Fiber Optic Cables Surplus fiber optic cables are previously manufactured or excess inventory that is sold at discounted prices. They are ideal for integrators, data centers, and industrial networks seeking high-quality cables without paying full catalog costs. Surplus stock can include single-mode, multi-mode, indoor/outdoor rated, armored, and custom-terminated cables . Key features of surplus fiber optic cables:

- Immediate availability:** Most surplus suppliers ship quickly, often within 1-2 business days .
- Cost savings:** Surplus pricing is typically lower than new catalog prices, sometimes with trade-in credit options .
- Quality assurance:** Reputable suppliers test and store cables indoors to maintain performance standards .
- Minimum order quantities:** Some suppliers, like AFL, require minimum orders (e.g., 1,000 ft) and may apply cut charges .

Examples of surplus suppliers include:

- Surplus Select:** Offers new and used OEM fiber cables with fast U.S. shipping and price-match guarantees .
- Wire Direct:** Sells surplus reels with shipping included for orders over \$1,500 .
- Remee Wire and Cable:** Provides REMnant™ excess inventory with the same quality as standard stock .
- American Tech Supply:** Maintains indoor-stored surplus bulk fiber with delivery within two days .

Pre-Reservation Options Pre-reservation or custom orders are generally handled directly through manufacturers or authorized distributors rather than surplus channels. This allows customers to:

- Specify custom lengths, connectors, and cable types.
- Schedule future delivery based on project timelines.
- Ensure availability for large-scale deployments where surplus stock may be insufficient. However, pre-reservation typ...
