Fiber optic splice box disassembly price

Overview

Per-splice pricing often ranges from $200 to $600, depending on the equipment and skill required. Repair projects combine several cost categories. The exact price hinges on splice complexity, fiber type (single-mode vs multimode), jacket condition, and whether the repair occurs on a backbone, distribution, or. I usually bill T&M, but it works out to about $175-250 for setup/teardown per site and $4-7 per fiber for prep in a new tray in an existing case and splicing depending on if it's flooded or dry cable. Add another $50-75 to prep a new case endspan or $100-150 for a new case midspan with overcut on. Fiber optic splicing costs vary widely depending on project size, location, fiber type, and site conditions. For most commercial projects, expect to pay $50–$150 per fusion splice point - but that number can swing in either direction based on the factors below. The term cost and price appear to frame the budgeting discussion early in. This price is fixed unit cost. Splicing Services – Enclosure Prep. 00 per Enclosure Point Travel/Mobilization – Travel/Mobilization will not be charged if the labor for each trip/phase exceeds the minimum labor work as indicated below.
