

High and Low Voltage Complete Sets of Equipment Electrical Engineering

Overview

This solution covers a complete set of power equipment from low-voltage distribution cabinets, high-voltage switchgear to transformers, automation control systems, etc., aiming to provide comprehensive and customized power solutions for various users. In most designs, these sets take care of more than 1 kV-high-voltage-and less than 1 kV. Our high and low voltage complete electrical equipment solutions are designed based on a deep understanding of the current development trends in the power industry and accurate predictions of future power demand. It elaborates on technical management contents such as design and manufacturing standards, installation and commissioning management framework. Electrical switchgear is a complete set of equipment composed of circuit breakers and isolation switches.
