

Home Indoor Terminal Box Red Light

Overview

Is your ONT showing a Flashing PON or Red LOS Light?

It may be you're affected by a wider issue in your area, you can check for outages on our Service Alerts page. If you're in the clear, we'll try restarting then resetting your ONT. An ONT box, also known as an Optical Network Terminal, is a device that converts optical signals from your internet service provider's (ISP) fiber-optic network into electrical signals that your devices can understand. It's usually installed at your home or business by your ISP and serves as the. If you find that the Optical/Config/PON Light on your Fibre ONT (Optical Network Terminal) box is flashing, has gone off, or has gone red, this indicates there may be an issue with the fibre connection coming into your property. What Can I Do?

First, please check that the optical cable which comes. If none of your devices can connect to the Internet, check the lights on the box on the wall, know as the ONT. IMPORANT: If you have an issue. Make sure all cable are secure/snug and haven't come loose. Power down for 15mins then power back on and wait 3mins for the lights to settle Power connector. Red FAIL light on the ONT usually means a fiber cut.
