

# How much does a 96-core optical fiber cable cost

## AI Overview

A 96-core optical fiber cable typically costs between \$0.30 and \$6 per foot, depending on fiber type, construction, and environmental rating. Price Range Single-mode (OS1/OS2) 96-core cables generally cost \$0.30 to \$2.80 per meter or approximately \$0.09 to \$1.52 per foot, depending on brand and quality of glass fiber used (generic vs. premium). Multimode (OM3/OM4) 96-core cables are more expensive due to wider cores and tighter manufacturing tolerances, ranging from \$1.50 to \$6 per foot. Armored or outdoor-rated cables add 20–50% to the base cost because of additional protective layers and environmental certifications. Factors Affecting Cost Fiber Type: Single-mode is cheaper per meter but may require more expensive transceivers; multimode is costlier but often used in data centers for short distances. Cable Construction: Loose tube, tight-buffered, armored, or non-armored designs influence material and production costs. Jacket Material and Environmental Rating: Outdoor PE jackets, UV resistance, and direct-burial certifications increase cost compared to indoor PVC or LSZH jackets. Brand and Quality: Premium brands like Corning offer lower attenuation and higher reliability, which increases price. Volume and Lead Time: Bulk orders (e.g., >10 km) reduce per-meter cost, while custom lengths or urgent orders increase it. Example Pricing Brand-Rex 96-core external single-mode cable is sold cut-to-order per meter, with a minimum order of 200 meters. Alibaba listings for 96-core G652D single-mode outdoor cables show prices varying widely depending on certification and sheath type. Summary For a 96-core optical fiber cable, expect a retail price range of roughly \$0.30 to \$6 per foot, with single-mode cables on the lower end and multimode or armored outdoor cables on the higher end. Bulk purchases, cable construction, and environmental ratings si...
