

How much does a Mexican aluminum alloy cable tray cost

AI Overview

Aluminum alloy cable trays in Mexico typically range from \$20 to \$150 USD per meter, depending on type, load capacity, and environmental specifications. Factors Affecting Price

Tray Type: Ladder, perforated, and solid-bottom trays differ in material usage and ventilation. Ladder trays are common for industrial and commercial applications and may cost more due to higher aluminum content and structural strength.

Material and Alloy Quality: High-grade aluminum alloys with superior corrosion resistance and UV protection are more expensive. Aluminum trays are lightweight, durable, and suitable for indoor and outdoor use.

Load Capacity: Trays designed to support heavy cable loads or dense wiring require thicker aluminum and reinforced structures, increasing cost.

Environmental Conditions: Outdoor or harsh industrial environments require corrosion-resistant and UV-protected trays, which are priced higher than standard indoor trays.

Installation Complexity: Pre-fabricated or modular trays with easy assembly features may have a higher upfront cost but reduce labor expenses.

Typical Price Range

- Light-duty aluminum trays (for low-load indoor applications): approximately \$20–\$40 USD per meter.
- Standard industrial ladder trays: approximately \$50–\$100 USD per meter.
- Heavy-duty or high-capacity trays with enhanced corrosion resistance: up to \$150 USD per meter.

Supplier Options in Mexico

- SIESA®:** Offers ladder-type aluminum trays with UV protection and fire-retardant properties suitable for industrial and commercial environments.
- EAE Electric:** Provides lightweight, high-strength aluminum cable ladders and trays with high load capacity and corrosion resistance.
- Powerack:** Supplies custom aluminum alloy cable trays with integrated structural and aesthetic performance.

For precise pricing, it is recommended to contact suppliers directly with specifications such as t...
