

How much does a fiberglass cable tray cost in Serbia

AI Overview

Fiberglass (FRP) cable trays in Serbia typically range from €50 to €150 per meter, depending on size, load capacity, and supplier. Fiberglass Reinforced Plastic (FRP) cable trays are designed for harsh environments, offering corrosion resistance, lightweight construction, and long-term durability, making them suitable for industries like oil and gas, petrochemicals, manufacturing, and mining. Prices vary based on tray width, height, thickness, and load rating, as well as the inclusion of accessories such as covers, splices, and support channels.

Factors Affecting Price

- Tray Dimensions:** Wider or deeper trays cost more due to increased material usage.
- Load Capacity:** Heavy-duty trays designed to support more weight are priced higher.
- Accessories:** Covers, junctions, and mounting hardware add to the total cost.
- Supplier and Brand:** Local Serbian suppliers may offer competitive pricing, while imported systems can be more expensive.
- Quantity:** Bulk orders often reduce the per-meter cost.

Supplier Options in Serbia

Brilltech Engineers and other local manufacturers provide FRP cable trays and can offer custom quotes based on project requirements. Cable House and similar suppliers emphasize industry-standard quality at competitive prices, with options for customization and immediate delivery. OBO and other distributors offer a range of cable support systems, including fiberglass trays, suitable for industrial installations.

For precise pricing, it is recommended to contact suppliers directly with your project specifications, including tray dimensions, load requirements, and quantity, to receive a tailored quote. This ensures you get the most accurate cost estimate for your needs in Serbia.
