

How much does an 8-core single-mode armored optical cable cost per meter

AI Overview

The price of an 8-core single-mode armored optical cable typically ranges from \$1.50 to \$3.50 per meter, depending on specifications, armor type, and supplier.

Overview An 8-core single-mode armored fiber optic cable is designed for high-performance, long-distance data transmission with enhanced mechanical protection. These cables often feature:

- Single-mode fibers (9/125 μ m) for long-range, high-bandwidth applications.
- Steel or aluminum armor for crush, rodent, and environmental protection.
- Single or double jacket structures for ease of installation and durability.
- Water-blocking and tensile strength members to ensure reliability in aerial, duct, or direct burial installations.

Price Factors The cost of these cables varies based on:

- Armor Type:** Steel wire armor (SWA) is more robust and slightly more expensive than aluminum interlocking armor.
- Installation Method:** Direct burial or outdoor-rated cables with additional water-blocking and UV resistance may increase the price.
- Supplier and Quantity:** Bulk orders or local distributors may offer lower per-meter pricing, while small orders or specialty suppliers may charge more.
- Brand and Certification:** Premium brands like HES or Starlight may have higher prices due to quality assurance and performance guarantees.

Typical Price Range

- Per meter: \$1.50 – \$3.50
- Per 500-meter reel: \$750 – \$1,750
- Per 1-kilometer reel: \$1,500 – \$3,500

These prices are indicative and may vary depending on region, shipping, and supplier stock. For exact pricing, it is recommended to contact suppliers directly, such as ME Fiber Optic, Fiber4U, or Connectec, and request a quote based on your required length and specifications.

Recommendations Confirm the armored type (steel vs aluminum) and installation environment before purchasing. Request length-specific quotes to account for cutting tolerances and shipping costs. Verify compliance with local standards for...
