

India 24-core optical cable

AI Overview

India-certified 24-core optical fiber cables are available in armored and unarmored versions, meeting RDSO and IRS standards for telecom, railway, and broadband applications.

Key Features

Certification and Standards: Many 24-core optical fiber cables in India are RDSO-approved and built to standards such as IRS:TC 55-2006 Rev.1 and RDSO/SPN/TC/110/2020 Rev.0, ensuring compliance with Indian railway and telecom requirements . Manufacturers like Finolex and M-Core Industries produce cables that meet national and international quality standards, including ISO certifications .

Construction Types:

- Armored Cables:** Feature corrugated steel or metallic armor for protection against mechanical damage, rodents, and harsh outdoor conditions. Suitable for direct burial, underground ducting, and high-traffic areas .
- Unarmored Cables:** Lightweight and flexible, ideal for indoor or controlled environments where mechanical protection is less critical .
- ADSS Cables:** Self-supporting for overhead installation on power lines, with aramid fiber reinforcement and polyethylene sheaths for tensile strength and weather resistance .

Performance Characteristics:

- Fiber Count:** 24 single-mode fibers for high-capacity data transmission .
- Low Attenuation:** Ensures minimal signal loss over long distances, suitable for backbone networks .
- High Bandwidth:** Supports high-speed internet, FTTH, and industrial automation networks .
- Environmental Resistance:** UV-resistant, weatherproof, and fire-retardant jackets for outdoor and critical applications .

Applications:

- Telecommunications and Broadband:** High-speed connectivity for urban and rural networks .
- Railway Signaling:** Reliable data transmission for signaling and communication systems .
- Industrial and Smart City Networks:** Supports automation, IoT, and intelligent infrastructure .
- Power Line Communication:** ADSS cables enable fiber deployment along high-voltage transmission lines .
