

Industrial Vision Switches

Overview

With high-speed 10-GE uplinks, high-wattage PoE options, ultra-low jitter, advanced network security features, and device-to-cloud performance monitoring with the Cisco ThousandEyes agent, these modular switches are your foundation for industrial AI. Achieve high-speed, ultra-low-latency image transmission and streamlined cabling through plug-and-play integration. InHand PoE+ unmanaged Gigabit switches provide the reliable, non-blocking bandwidth and integrated power essential for high-resolution automated inspection lines. Automated Optical. Find the right Hikvision products for your needs! Use the search criteria to find all available accessories for your camera model. Hikvision's complete people and vehicle access. Beyond inspection, machine vision unlocks new possibilities in logistics tracking operations and analysis, remote monitoring and control of industrial processes, and guiding robots in sorting mixed components and precisely aligning parts for assembly. The use cases for machine vision are expanding. Elevate your industrial operations with an AI-ready, rugged network that offers peak performance, high resilience, advanced security—and that smoothly integrates IT proficiencies into OT environments. Inventory industrial assets and their network activities. Prioritize action by identifying vulnerabilities that bad actors are exploiting.

InHand PoE+ Switches for Industrial Machine Vision Systems

By providing up to 30W of PoE+ power per port, the switches power high-speed industrial cameras and transmit large image files over a single Ethernet cable.

Cisco Cyber Vision

Transform your industrial networks into powerful OT security assets with Cisco Cyber Vision—for visibility, segmentation, and secure remote access at scale.
