

Management unit of communication optical cables

Overview

An Optical Distribution Frame (ODF) is a central hub in fiber optic networks, crucial for managing and organizing the myriad of fiber optic cables and connections entering a facility. However, it is not always easy to find out what has been covered, and where it can be found. UnitekFiber provides a series of horizontal and vertical types of fiber optic cable. Effective fiber optic cable management helps you ensure stable networking and high-speed data transfer. Traditional methods can slow down your operations and increase the. UK Specialists in Fibre Optic Test Equipment, Data networking & Structured Cabling — Aligned with BS EN Compliant Solutions for Data Centres & ICT Installers Effective cable management is essential for maintaining a well-organised and efficient network infrastructure. It provides 10/100Mb/s rate FE interface or 100Mb/s rate SFP interface.
