

Mozambique offers fiber optic cable delivery service

AI Overview

Mozambique offers extensive fiber optic connectivity through local providers, international subsea cables, and installation services for businesses and telecom operators. Subsea Cable Infrastructure Mozambique is connected to multiple international subsea fiber optic cables, including SEACOM (2009), EASSy (2010), and 2Africa (2023), landing in Maputo and Nacala. These cables provide high-capacity links to Europe, Asia, and other parts of Africa, ensuring reliable international connectivity. Vodacom, Movitel, and Mozambique Telecom (Tmcel) operate the fiber backbones and manage access to these subsea cable landings, with Vodacom serving as the landing partner for the 2Africa cable. Local Fiber Optic Service Providers Several companies in Mozambique offer fiber optic services and installation: Seacom provides resilient connectivity, cloud, security, and managed services, leveraging its subsea cable network to deliver high-speed fiber connectivity to businesses across Mozambique. FOESS LDA specializes in fiber optic projects, design, consulting, and installation, serving both national and international clients with professional engineering and technical support. Eban Mozambique offers fiber optic cable installations, including GPON, as well as CAT6, CAT6A, and CAT7 cabling for data centers, offices, and collaboration areas. Fiber Optic Equipment and Suppliers Mozambique also imports fiber optic equipment from global suppliers. There are 16 verified international suppliers exporting fiber optic products to Mozambique, providing options for high-volume procurement, competitive pricing, and reliable delivery. This allows businesses and telecom operators to source cables, connectors, and related infrastructure efficiently. Summary Mozambique's fiber optic ecosystem combines international subsea connectivity, local telecom operators, and specialize...
