

Optical Cable Hanging Process

Overview

Many people are confused about the hanging of aerial optical cables. In fact, there are two methods for aerial optical cables laying: one is "fixed-pulley traction method", including "manual traction method" and "mechanical traction method"; the other is "cable tray moving and releasing method". One must follow safety protocols, standards, and company safety practices and policies. Failure to do so can result in life-threatening accidents, such as falling from a truck or on a ladder so that it cannot fall. Use the leather gloves when. Deploying fiber above ground on poles or towers removes the need for underground digging and is particularly useful when the ground is uneven, rocky or both. These include pulling, blowing, and pushing into ducts, direct burial, and aerial installation. The installation of aerial fiber optic cables can be an Overview of Installation Techniques reveals a variety of methods used to install Optical Fiber Cables, each suited to different environments and requirements.
