

Optical module jumper SC and LC

Overview

Most SFP fiber optic modules use LC connectors, while SC connectors are mainly found in legacy networks and MPO/MTP connectors are used for high-density cabling rather than directly on standard SFP modules. “OFC connector type” is often used informally to mean optical fiber connector type and typically refers to LC, SC, ST, FC, MPO/MTP and others—choose based on device interface and optical budget. This connector landscape reflects how modern SFP deployments prioritize port density and. This article provides a complete, practical guide to choosing the right fiber optic connector for modern networks. It explains all major connector types (LC, SC, MPO/MTP, ST, FC, rugged industrial connectors), the differences between simplex/duplex, single-mode/multimode, boot types, polish types. Corning offers the most complete line of connectors and factory-terminated cables, from single-fiber jumpers to high-fiber-count assemblies. 2 mm cable assemblies are offered in LC and SC connector options. RoHS-compliant zipcord, DFX®, MIC®, Fan-out, and RIC cables are also available.
