

Original optical module supply price quote

AI Overview

To obtain an original price quote for Cisco optical modules, you should select the specific module type and request a quote from authorized distributors or Cisco-certified resellers. Key Considerations for Pricing:

- Module Type and Form Factor:** Cisco optical modules come in various types including SFP, SFP+, SFP28, QSFP, QSFP28, QSFP-DD, OSFP, CFP, and CPAK. Each type supports different speeds (1G, 10G, 25G, 40G, 100G, 400G, 800G) and reach (short, long, or extended) depending on your network requirements.
- Compatibility:** Ensure the module matches your Cisco device, port form factor, fiber type, wavelength, and software release. Using the Cisco compatibility matrix helps avoid mismatches.
- Availability and Condition:** Modules may be new, refurbished, or remanufactured, which affects pricing. Refurbished modules like ONS 15454 Optical Booster or Pre-Amplifier Modules are often available at lower cost than new units.
- Pricing Sources:** Cisco Global Price List provides official pricing for various optical modules and transceivers. Authorized distributors and resellers such as router-switch.com or layer23-switch.com allow you to request a quote and confirm availability. Wholesale platforms like Made-in-China or Alibaba offer competitive pricing for bulk purchases, but ensure modules are genuine and compatible.

How to Request a Quote: Identify the exact module you need (e.g., GLC-LH-SMD, SFP-10G-SR, QSFP-100G-SR4). Check Cisco compatibility for your device and software version. Contact an authorized Cisco reseller or distributor via their website or sales contact form. Many sites provide a "Request a Quote" option for real-time pricing and delivery information. Specify quantity, condition (new or refurbished), and delivery location to receive an accurate quote. By following these steps, you can obtain a reliable original price quote tailored to your network requirements and ens...
