

Outdoor Waterproof Network Cabinet Price List

AI Overview

Outdoor waterproof network cabinets typically range from \$100 for small wall-mounted units to over \$2,000 for large, fully weatherproof, free-standing racks with advanced features.

Price Ranges

Small Wall-Mounted Cabinets: Compact enclosures suitable for routers, patch panels, or small network devices generally cost \$100–\$300 depending on material (ABS, polycarbonate, or steel) and IP rating (IP54–IP65).

Medium-Sized Cabinets: Floor-standing or larger wall-mounted cabinets with enhanced weatherproofing, ventilation, and lockable doors typically range from \$400–\$1,000.

High-End or Custom Cabinets: Premium outdoor cabinets with IP66/NEMA 4X ratings, integrated cooling, battery backup, remote monitoring, and corrosion-resistant materials can exceed \$1,500–\$2,500 or more, especially for industrial, telecom, or smart city applications.

Factors Affecting Price

Material Quality: Stainless steel, galvanized steel, or UV-resistant polymers increase durability and cost.

IP/NEMA Rating: Higher protection against water, dust, and corrosion (IP65–IP66, NEMA 4X) adds to the price.

Size and Capacity: Larger cabinets that accommodate full-height racks or multiple devices cost more.

Cooling and Ventilation: Cabinets with fans, thermostats, or air conditioning systems are more expensive.

Additional Features: Lockable doors, modular designs, remote monitoring, and IoT integration increase upfront costs but improve long-term reliability.

Bulk Orders: Suppliers may offer discounts for large quantities, e.g., \$10/unit for orders of 100+ units for basic models.

Buying Tips

Ensure the cabinet meets at least IP65 for outdoor use. Consider long-term total cost of ownership, including maintenance, energy efficiency, and lifespan. Check for warranty and technical support, ideally a minimum of 2 years for critical deployments. Evaluate compatibility with existing racks, cabling, and power...
