

Price of Fiber Optic Cable Shielding Cabinet

AI Overview

Fiber optic cable shielding cabinets typically range from \$200 to over \$2,000 depending on type, capacity, and environmental protection. Price Overview The cost of a fiber optic cabinet varies widely based on type, size, material, and protection level. Basic indoor wall-mounted mini cabinets for small networks can start around \$200-\$400, while larger outdoor distribution cabinets with IP65 protection, stainless steel construction, and high fiber capacity can exceed \$1,500-\$2,500. Customizable options, such as 19-inch rack compatibility, pole or ground mounting, and additional security features like padlock doors, can further increase the price. Factors Affecting Cost Cabinet Type: Indoor ODF cabinets are generally less expensive than outdoor street cabinets due to lower environmental protection requirements. Material: Stainless steel or high-quality steel cabinets offer better durability and weather resistance, which increases cost. Capacity: Cabinets designed to handle more fiber connections or multiple splitters (PLC, WDM) are more expensive. Environmental Protection: Outdoor cabinets with IP55-IP65 ratings provide dust and water resistance, essential for FTTH or FTTB networks, and cost more than indoor models. Customization: Options like modular racks, battery drawers, or specialized mounting configurations add to the price. Typical Applications Indoor Cabinets: Used in server rooms or controlled environments for fiber termination and distribution. Outdoor Cabinets: Installed in street or access networks to protect fiber from weather, dust, and mechanical damage. Shielding Features: Cabinets with enhanced shielding prevent electromagnetic interference, ensuring signal integrity for high-speed data transmission. Recommendation For budgeting purposes, small-scale indoor cabinets can be purchased for a few hundred dollars, while high-capacity outdoor cabinets fo...
