

Price of Mesh Cable Tray Figure-Eight Supports

AI Overview

The price of a Mesh Cable Tray Figure-Eight Support typically ranges from \$10 to \$50 per piece, depending on size, material, and supplier. Mesh cable tray supports, including figure-eight types, are used to secure and route wire mesh trays in industrial, commercial, or data center installations. Prices vary based on material (steel, stainless steel, or galvanized), finish, and load capacity, as well as the supplier and order quantity. For example, standard wire mesh trays and accessories from suppliers like Grainger or Alibaba show that small support fittings generally cost between \$10 and \$50, while larger or custom supports may be higher.

Factors Affecting Price

- Material:** Stainless steel or HDG (hot-dip galvanized) supports are more expensive than plain steel.
- Size and Load Rating:** Supports designed for heavier cable loads or wider trays cost more.
- Supplier and Brand:** Premium brands like OBO or PohlCon may charge more for certified or guaranteed products.
- Quantity:** Bulk orders often reduce the per-unit cost.

Where to Purchase

- Grainger:** Offers a wide range of wire mesh trays and accessories, including supports, with online ordering and fast delivery.
- Alibaba:** Provides custom sizes and bulk pricing for industrial wire mesh cable trays and supports.
- PohlCon and OBO:** European suppliers with certified mesh cable tray systems and accessories.

For the most accurate pricing, it is recommended to contact suppliers directly with the specific tray width, support type, and material requirements. This ensures you receive a quote tailored to your installation needs.
