

Price of Standing Distribution Box

AI Overview

The price of a standing distribution box typically ranges from \$200 for small residential units to over \$2,000 for industrial-grade enclosures, depending on size, material, and internal components.

Price Range and Factors

The cost of a standing distribution box varies widely based on several factors:

- Material of the enclosure:** Basic ABS plastic units are the most affordable, while powder-coated steel or high-grade stainless steel boxes are more expensive due to durability and weather resistance.
- Internal components:** Empty boxes are cheaper, but adding circuit breakers, surge protectors, and busbars increases the price significantly.
- Capacity and specifications:** Voltage rating, amperage, and number of circuits affect cost. Residential single-phase units are generally less expensive than three-phase commercial or industrial systems.
- Installation environment:** Outdoor-rated, weather-resistant boxes carry a premium compared to indoor units.
- Customization and OEM options:** Custom layouts, modular designs, and IP-rated enclosures can increase the price, especially for bulk or wholesale orders.

Typical Applications

- Residential:** Small homes or apartments, usually single-phase, priced around \$200–\$500.
- Commercial:** Office buildings, retail spaces, or small industrial setups, often three-phase, priced \$500–\$1,500 depending on features.
- Industrial:** Large factories, data centers, or heavy machinery setups, with high durability and advanced control systems, can exceed \$2,000.

Additional Considerations

When budgeting for a standing distribution box, consider installation costs, maintenance, and compliance with electrical codes. Advanced units may include smart monitoring, remote control, and digital displays for real-time system performance tracking. For bulk purchases or custom designs, contacting manufacturers directly can provide wholesale pricing and faster delivery options.
