

Price of complete electrical distribution boxes in Namibia

AI Overview

A standard household electrical distribution box in Namibia typically costs between \$150 and \$1,500, depending on size, amperage, and installation complexity.

Price Range and Factors

The cost of a distribution box (also called a panelboard or breaker panel) depends on several factors:

- Box size and amperage:** Standard residential panels for 100–125 amp service are common, while larger or three-phase systems cost more.
- Number of circuits:** More breaker spaces increase the price.
- Material and enclosure type:** Weather-resistant or outdoor-rated boxes are more expensive than indoor units.
- Installation and labor:** Professional installation can significantly affect the total cost, often ranging from \$150 to \$1,500 for typical residential setups.
- Additional features:** Smart monitoring, digital displays, or advanced safety features can increase upfront costs.

Typical Residential Costs

- Basic single-phase indoor panel: \$150–\$450
- Standard 100–125 amp panel with installation: \$450–\$1,500
- High-capacity or three-phase panels: \$1,000–\$1,900, depending on complexity and labor

Considerations for Namibia

Prices may vary due to import costs, local suppliers, and labor rates. Local electrical wholesalers or hardware stores in Namibia may offer similar products to South African suppliers like Buco, Builders, or ARB, which stock a range of DB boxes and circuit breakers. Always ensure the distribution box complies with Namibian electrical codes and is installed by a licensed electrician for safety. Investing in a quality distribution box ensures reliable power distribution, safety, and long-term durability, reducing maintenance costs over time.
