

Price of flame-retardant cable trays in China and Europe

AI Overview

Flame-retardant cable trays in China typically range from \$15 to \$50 per meter, while in Europe prices are higher, generally between €40 and €120 per meter, depending on material, fire rating, and supplier. Pricing in China

In China, flame-retardant cable trays are widely manufactured using FRP (Fiber Reinforced Polymer), steel, or aluminum. FRP trays are popular for their corrosion resistance, lightweight, and fire-retardant properties. Factory-direct or OEM options are available, which can reduce costs, especially for bulk orders. Typical price ranges are:

- FRP ladder-type trays: \$15–\$35 per meter
- Steel or aluminum trays with fire-retardant coating: \$25–\$50 per meter

Prices vary based on load capacity, tray width, fire rating, and customization. Large infrastructure projects or industrial orders often benefit from volume discounts.

Pricing in Europe

In Europe, flame-retardant cable trays are subject to stricter fire safety regulations (e.g., IEC, EN standards), which increases production costs. Materials include powder-coated aluminum, galvanized steel, and FRP with intumescent coatings. Approximate price ranges are:

- FRP trays: €40–€80 per meter
- Steel/aluminum heavy-duty trays: €60–€120 per meter

European prices are influenced by certification requirements, labor costs, and local manufacturing standards. Retrofit projects or high-safety installations, such as data centers or industrial plants, often require premium trays with higher fire ratings, further increasing costs.

Market Considerations

China is a major manufacturing hub, offering competitive pricing and customization options for large-scale projects. Europe has a mature market with higher compliance costs, but suppliers provide certified, high-quality trays suitable for critical infrastructure.

Material choice: FRP is cost-effective and corrosion-resistant, while steel/aluminum provides higher load capacity and dur...
