

Price of low-voltage distribution boxes in Suriname

AI Overview

Low-voltage distribution boxes in Suriname typically range from USD 100 to over USD 2,500 depending on type, capacity, and brand. Price Overview The cost of low-voltage distribution boxes varies widely based on brand, amperage rating, enclosure type, and whether the unit is new or used. For example: Small indoor load centers (e.g., 6–24 circuits, 125–150A) from brands like GE or Cutler Hammer generally cost USD 100–500. Heavy-duty industrial units such as ABB 2500A Spectra Series or busway end tap boxes for 600V, 3-phase systems can exceed USD 2,000–2,500. Custom or specialized panels designed for industrial applications may be priced higher, depending on configuration and certification requirements. Suppliers in Suriname Several local and regional suppliers provide low-voltage distribution boxes: ECIS N.V.: Offers design, supply, and installation of low-voltage systems, including custom panel construction and certification services. Dongfeng distributors: Provide a variety of distribution boxes and cabinet products suitable for residential, commercial, and industrial applications. Machinio listings: Include both new and used indoor electrical distribution boxes from international brands, which can be imported to Suriname. Market Considerations Import costs: Many high-capacity or branded units are imported, so shipping, customs duties, and local taxes can significantly affect the final price. Market trends: According to 6Wresearch, the Suriname low-voltage energy distribution market is growing, with increasing demand for industrial and commercial installations, which may influence pricing and availability. Customization: Prices can vary if panels are custom-built to meet specific industrial or safety standards, including NEMA or IEC certifications. Recommendations Contact local suppliers like ECIS N.V. for quotes tailored to your project specifications. Compare new vs. used u...
