

Price of safety signs in distribution boxes

AI Overview

Safety signs for distribution boxes typically cost between £3 and £25 each, depending on material, size, and compliance requirements.

Typical Price Ranges

Basic signs: Standard PVC or aluminium hazard and mandatory signs usually cost £3–£10 per sign. These are suitable for general distribution box labeling.

Specialized signs: Photoluminescent, chemical hazard, or ISO/BS EN 7010-compliant signs range from £12–£25 per sign due to additional coatings and certification marks.

Custom or small-batch signs: Bespoke signs under 10 units can cost £30–£100 each, reflecting setup and artwork fees.

Factors Affecting Cost

Material: PVC, aluminium, steel, or composite materials influence durability and price.

Size and format: Larger or uniquely shaped signs increase cost.

Compliance and certification: Signs meeting ISO, BS EN, or photoluminescent standards are more expensive.

Customization: Adding logos, specific warnings, or unique designs raises the price.

Bulk orders: Ordering over 100 signs can reduce unit costs by 30–60%, making large-scale purchases more economical.

Supplier Options

Safety Signs and Notices: Offers a wide range of warehouse and distribution safety signs suitable for marking distribution boxes.

The Sign Company UK: Provides detailed pricing guidance and options for both standard and custom industrial signs.

Stock Signs and Direct Signs: Offer bulk and bespoke signage with ISO-compliant materials and flexible ordering options.

Safety Sign Depot: Competitive pricing with bulk discounts and compliance with UK health and safety regulations.

Recommendations

For distribution boxes, basic PVC or aluminium hazard signs are usually sufficient unless specific chemical or electrical hazards require photoluminescent or certified signs. For large facilities, consider bulk orders to reduce costs. Always ensure signs meet UK safety standards to maintain compliance and workplace safety.
