

Price quote for 2-core bundled optical cable

AI Overview

The price of a 2-core bundled optical cable varies widely depending on type, length, and connectors, typically ranging from a few dollars per meter to higher for premium single-mode cables.

Factors Affecting Price

Cable Type: Single-mode (SM) cables are designed for long-distance, high-speed communication and generally cost more than multi-mode (OM1-OM5) cables. Multi-mode cables are suitable for short-distance, general-purpose applications and are usually less expensive.

Length and Quantity: Prices are often quoted per meter or per roll. Longer lengths or bulk orders can reduce the per-meter cost.

Connectors and Terminations: Cables can come with various connectors (SC, LC, ST, FC, MU, SMA905) or open ends. Pre-terminated cables with connectors are more expensive than bare fiber.

Jacket and Reinforcement: LSZH (Low Smoke Zero Halogen) jackets, aramid yarn reinforcement, and FRP layers for durability increase cost.

Supplier and Certification: CE-certified or high-quality FTTH cables may carry a premium. Prices vary by supplier and region.

Typical Price Ranges

Multi-mode 2-core cables: Approximately \$1-\$3 per meter for standard LSZH or PVC jackets.

Single-mode 2-core cables: Approximately \$2-\$6 per meter, depending on quality, reinforcement, and pre-terminated connectors.

Bulk orders or customized lengths may reduce the per-meter cost, while specialized standards like G.657.A2 or G.657.B3 may increase it.

Recommendations

Specify your requirements: mode (SM or OM), length, connectors, and jacket type when requesting a quote.

Compare suppliers: Platforms like Alibaba, TYCLON, and FindLight offer multiple options and allow for bulk pricing inquiries.

Consider future expansion: Bundled cables with extra cores may be cost-effective if network growth is anticipated. By providing these details to suppliers, you can obtain an accurate price...
