

Prices of galvanized molded cable trays in North Africa

AI Overview

Galvanized cable trays in Africa typically range from \$15 to \$60 per 2-2.5 meter section, depending on size, thickness, and type. General Price Ranges Based on regional African markets, galvanized cable trays are priced according to dimensions, sheet thickness, and type:

- Small trays (25-50mm width, 1mm thickness): Approximately \$15-\$25 per 2-2.5 meter section (common in Kenya and Nigeria)
- Medium trays (100-200mm width, 1-1.2mm thickness): Around \$25-\$40 per section, suitable for commercial and industrial installations
- Large trays (250-400mm width, 1-1.5mm thickness): \$40-\$60 per section, designed for heavy-duty or high-capacity cable routing

Types and Materials

- Galvanized Steel: Most common, corrosion-resistant, suitable for indoor and outdoor use
- Powder-Coated Galvanized Steel: Offers additional protection and aesthetic finish, slightly higher cost
- Other metals: Stainless steel and aluminum are available but generally more expensive

Standard Dimensions

- Length: 2-2.5 meters per section
- Width: 25mm to 400mm
- Height: 25mm to 50mm or more for heavy-duty trays
- Thickness: 0.6mm to 3.0mm depending on load requirements

Considerations for North Africa

Prices may be higher than East or West Africa due to import duties, shipping, and local manufacturing availability. Local suppliers in countries like Egypt, Morocco, and Algeria may offer competitive pricing for standard sizes, but custom dimensions or heavy-duty trays could increase costs. For large projects, bulk orders often reduce per-section costs.

Summary

For North African projects, expect galvanized molded cable trays to cost roughly \$15-\$60 per 2-2.5 meter section, with variations based on size, thickness, and finish. It is advisable to contact local distributors for precise quotes, especially for large-scale industrial or infrastructure projects.
