

Production in Singapore

Overview

SINGAPORE: Singapore's manufacturing output increased by 13 per cent year-on-year in May, driven by another month of strong electronics production fuelled by demand for AI-related products. 5% in the previous month and missing market expectations of 17%. 8 per cent on the back of robust AI-related demand, said the Economic Development Board. This picture shows a robotic arm transferring a wafer fab inside its manufacturing facility at Singapore GlobalFoundries in Singapore on Sep 12, 2023. Excluding biomedical. Prior to 2002, figures refer to establishments engaging 10 or more workers. Total manufacturing output refers to the total value of goods and services. Manufacturing has been a key driver of Singapore's economy since its independence. The Unit Business Cost Index (UBCI) is compiled by the Singapore.
