

Protection level of low-voltage dense busbars

Overview

Busbar rating: 1600–6300 A depending on load density; consider temperature rise and ambient. Short-circuit withstand: kA rating must exceed available fault current with margin; verify bracing and tested assemblies. The IEC 61439. These requirements are necessary to keep the level of error voltage as low as possible to prevent maloperation of the relay. In addition. Rated voltage does not exceed 1 000 V AC or 1500 V DC. Generation, transmission, distribution and control of electric energy. Electrical equipment of.
