

S3500 Core Switch

Overview

Aruba S3500 Series Switches: Access product support documents and manuals, software, download drivers by operating environment, and view product support videos. It has up to 30 watts per port based on the IEEE 802. Its high-performance ASIC and modular design enable you to employ a suitable number of interfaces and to configure various networks with great flexibility, all based on their individual requirements. It supports many access authentication models that can be. The Aruba Networks™ S3500 Mobility Access Switch is a new class of product that brings user role-based access to wired networks. The S3500 is an integral part of the Aruba Mobile Virtual Enterprise (MOVE) architecture, which delivers secure virtualized access services to users, independent of their location, access points and an optional uplink module. Power-over-Ethernet (PoE) models are.
