

Safety Distribution Box Power Strip

AI Overview

Industrial and safety power strips provide multiple outlets with surge protection, overload prevention, and compliance with safety standards for use in distribution boxes. Key Features to Consider:

- 1. Industrial-Grade Construction:** Safety power strips designed for distribution boxes often feature all-metal or heavy-duty casings to withstand harsh environments, including workshops, construction sites, and factories. Eaton's safety power strips, for example, are built for industrial use and comply with OSHA guidelines, with bright colors to alert users to potential hazards.
- 2. Surge and Overload Protection:** Many safety power strips include built-in circuit breakers or surge protection to prevent damage to connected equipment and reduce the risk of fire or electrical shock. Products like the HANNELORE 7-way power strip offer surge protection and multiple safety certifications (CE, UKCA, FCC, RoHS) for reliable operation.
- 3. Outlet Configuration and Compatibility:** Choose power strips that accommodate large transformer plugs without blocking adjacent outlets. Industrial strips often come in various outlet counts and cord lengths to suit different distribution box setups.
- 4. Compliance and Testing:** For construction or industrial use, ensure the power strip or distribution system complies with DGUV regulation 3 or equivalent local safety standards. Some suppliers, like Elektron Berlin, provide individual electrical safety tests after installation to ensure legal compliance and safe operation.
- 5. Mounting and Accessibility:** Many industrial power strips can be wall-mounted, rack-mounted, or attached to workbenches, providing flexibility in distribution box setups. Some models allow rotation or adjustable mounting for easier access to outlets.

Recommended Options:

- Eaton Safety Power Strips:** Rugged, OSHA-compliant, suitable for industrial and commercial environments, with multiple outlet configurations and transformer-friendly spacing.
- Elektron Berlin Power Distributors:** Customizable power distribution boards and site cabinets with built-in safety features...
