

Seal of the distribution box

Overview

Seal an electrical enclosure by matching the IP/NEMA rating, using the right gasket, cable glands, sealant, and inspection steps to block dust, water, and corrosion. The groove contours of electronic distribution boxes and the very narrow grooves of micro-distribution housings are seamlessly sealed with the sealing foams of the polyurethane-based FERMAPOR K31 or the silicone-based FERMASIL product families. The prerequisite for the exact application of sealing. The lifelines of highly automated industrial production for electrical distribution and for the control and safety technology of manufacturing plants come together in control cabinets and electrical distribution boxes right down to the micro distribution boards. Control cabinets protect and. Outdoor power distribution box equipment operates in harsh year-round environments, prone to insulation aging, water ingress and short-circuit faults that jeopardize stable power supply. Our 4" seal fits our 4-hole, 7-Hole and 10-Hole plastic D-Boxes. It accepts 2", 3", 4" and corrugated pipe. No other seals can do so much! Looking for a personalised quote?

How. Selection and installation of waterproof junction box sealing strip/waterproof ring: Select sealing strip or waterproof ring suitable for the size of waterproof distribution box base to ensure waterproof electrical box has good elasticity and durability.
