

Senegal long-distance optical cable 4-core three-year warranty

AI Overview

4-core single-mode optical fiber cables suitable for long-distance use are available in Senegal and can come with a three-year warranty from reputable manufacturers.

Product Overview For long-distance telecommunications, 4-core single-mode optical fiber cables are commonly used due to their high performance and minimal signal loss over extended distances. These cables typically feature:

- Outer Diameter (OD):** Around 5.8 mm
- Construction:** Two layers of Fiber Reinforced Plastic (FRP) and yarn for added durability
- Design:** Suitable for both indoor and outdoor installation
- Applications:** Internet connectivity, CATV, and telecom networks
- Fiber Type:** Single-mode, which allows light signals to travel directly through the core with minimal deviation, ideal for long-distance transmission

Availability in Senegal Suppliers such as Lantekshop distribute fiber optic materials and equipment in Senegal, including 4-core optical cables suitable for network operators and ISPs. These suppliers can provide guidance on quantities, installation, and compatibility with existing infrastructure.

Warranty Information Many optical cable manufacturers and network equipment providers offer three-year warranties on hardware and fiber products. For example:

- Cambium Networks** provides a standard three-year warranty on hardware shipped after October 1, 2018, covering defects in material and workmanship, with repair or replacement options.
- Corning Optical Cable** warranties cover defects in material and workmanship under normal use, with options for repair, replacement, or credit, which can be transferred to the buyer.

When purchasing, it is important to confirm that the warranty applies specifically to the optical cable and not just associated equipment, and to register the product if required.

Recommendations Verify that the cable is single-mode for long-distance ap...
