

Tools for cutting power cables

AI Overview

Cable cutters are specialized tools designed to safely and efficiently cut power cables, ranging from manual to ratcheting and hydraulic models depending on cable thickness and material.

Types of Cable Cutters

- Manual Cable Cutters:** Ideal for smaller gauge copper and aluminum wires, these cutters use leverage from handles to make clean cuts without deforming the cable. They are lightweight, portable, and suitable for residential or light commercial electrical work.
- Ratcheting Cable Cutters:** These cutters use a ratchet mechanism to multiply hand force, allowing users to cut thick copper or aluminum cables with minimal effort. They reduce hand fatigue and are suitable for repetitive, high-volume tasks.
- Hydraulic Cable Cutters:** Powered by an internal hydraulic system, these cutters can slice through very thick or armored cables quickly and efficiently. They are commonly used in industrial, utility, or large-scale electrical installations.
- Heavy-Duty Wire Cutters:** Compact yet powerful, these cutters are designed for thick wires, chains, or cables. They often feature spring-loaded jaws and ergonomic handles for comfort and precision.

Key Features to Consider

- Cutting Capacity:** Ensure the cutter can handle the cable diameter and material (copper, aluminum, steel, or armored cables) you work with.
- Blade Material:** High-carbon or forged steel blades maintain sharpness and provide clean cuts.
- Handle Design:** Cushioned, ergonomic, or insulated handles improve comfort and safety, especially when working with live circuits.
- Mechanism:** Ratcheting or hydraulic mechanisms are essential for thick or high-volume cable cutting.
- Precision:** Shear-type jaws or precision-ground edges prevent fraying and ensure reliable connections.

Recommended Models

- Klein Tools 63050 Cable Cutter:** Professional-grade, shear-type jaws, handles thick aluminum and copper cables, ideal for commercial and utility work.
- Park Tool CN-10 Professional Cable Cutter:** Precision cutter for bicycle and small electrical cables, with built-in crimper and heat-treated handles.
- WORKPRO Heavy...**
