

Turkmenistan Straight-through Bridge

Overview

The newly built M37 Turkmenabat–Farap road is located in the capital of Lebap Province in the east of Turkmenistan. For part of its route it is carried by the new 1. Turkmenistan's new bridge is benefiting from a novel sealing system that will optimise working life as well as maximising safety. The project is of note as the structure is the longest metal span. The 1915 Çanakkale Bridge (Turkish: 1915 Çanakkale Köprüsü) is a road suspension bridge in the province of Çanakkale in northwestern Turkey, first opened on 18 March 2022. Situated just southwest of the coastal towns of Lapseki and Gelibolu, the bridge spans the Dardanelles, about ten. A Bering Strait crossing is a hypothetical bridge or tunnel that would span the relatively narrow and shallow Bering Strait between the Chukotka Peninsula in Russia and the Seward Peninsula in the U. The crossing would provide a connection linking the Americas and Afro-Eurasia. Today, measures taken to create a modern transport and transit logistics infrastructure in the country provide a powerful impetus for the development of the national economy and the expansion of regional cooperation.
