

View switch core chip information

Overview

The System Information Display provides comprehensive diagnostic tools for viewing and extracting detailed information about the Nintendo Switch hardware. This includes hardware specifications, component identifiers, fuse configurations, memory details, and more. BIOS version: Boot to BIOS “set-up” screen. The Nintendo Switch's processor, manufactured by NVIDIA, was a clever design. It utilizes a Cortex-A57 / -A53 architecture. You need to have installed Tesla environment to use it. If it's not working in dock, you need to first start. This branch is 2 commits behind sthetix/DIAGRAM:main. Use this diagram for various uses. be/RK5FQZe1MA As If somehow you don't have / lost the USB. Modchips allow any console, including all patched consoles, to run CFW! Patched Switch consoles (consoles produced after mid-2018) are immune to the fusee-gelee exploit in RCM. Attempting to inject a payload via RCM on a Patched console will be unsuccessful.
