

What is alwx a distribution box

Overview

A distribution box, also known as a distribution panel or board, is a cabinet that holds electrical parts used to supply power to multiple circuits within a system. It acts as the central point where electricity distribution is managed inside a building. The box usually contains switches, fuses, or. Advantages of ALWX series intelligent box type non negative pressure water supply equipment: It can effectively utilize the pressure of municipal pipeline network, save 30% to 50% energy compared with traditional box type variable frequency water supply equipment, and provide water supply to users. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices.
