

The Netgear Nighthawk RS700S and TP-Link Archer AX55/AX21 are top choices for fiber internet with designs that support discreet placement and easier cable management.

Key Considerations for Hiding Fiber Cables

When selecting a router for hiding fiber optic cables, consider:

- Internal Antennas:** Routers with internal antennas, like the Netgear Nighthawk RS700S, eliminate bulky external antennas, making it easier to place the router in cabinets or behind furniture without obstructing signals.
- Compact Design:** Smaller or wall-mountable routers reduce visible clutter and allow fiber cables to be routed neatly along walls or behind furniture.
- Multiple LAN Ports:** Routers with sufficient Ethernet ports (4 or more) allow you to connect devices directly while keeping cables organized and hidden.
- Wi-Fi 6/7 Support:** High-speed wireless standards reduce the need for long Ethernet runs, allowing more devices to connect wirelessly and minimizing exposed cables.

Recommended Routers

Router Model	Key Features
Netgear Nighthawk RS700S (Wi-Fi 7)	Tri-band Wi-Fi 7 for multi-gig fiber plans, 8 internal antennas for wide coverage (up to 3,500 sq. ft.), 10G WAN/LAN and four 1G LAN ports, compact design suitable for discreet placement.
TP-Link Archer AX55 (Wi-Fi 6)	Reliable performance for budget-conscious users, dual-band Wi-Fi with OFDMA and MU-MIMO for multiple devices, supports beamforming to direct signals efficiently, reducing the need for visible cable runs.
TP-Link Archer AX21/AX1800 (Dual-band Wi-Fi 6)	Router, compact and lightweight, ideal for hiding in cabinets, supports multiple devices with minimal latency.

Tips for Cable Management

- Use cable clips or channels to route fiber cables along walls or behind furniture.
- Consider wall-mounted or shelf placement to keep the router and cables out of sight.
- Short Ethernet cables reduce clutter and make it easier to hide connections.
- If possible, run fiber cables inside walls or use de...
